

ANSHUMAAN PANIGRAHI

AI/ML Engineer • Data Scientist • Machine Learning Engineer

anshumaan342@gmail.com | +91 6371517119 | Bhubaneswar, Odisha | linkedin.com/in/anshumaanpanigrahi | github.com/Anshumaan09

PROFESSIONAL SUMMARY

AI/ML Engineer with proven experience deploying production ML systems — including a telecom recommendation engine that drove 15% revenue growth and a GenAI persona chatbot with emotionally intelligent multi-turn dialogue. Skilled in Python, Scikit-Learn, and end-to-end ML pipelines; actively advancing in PyTorch, TensorFlow, and LLMs. Targeting AI Engineer, ML Engineer, and Data Scientist roles at product-focused companies.

PROFESSIONAL EXPERIENCE

Programmer Analyst Trainee | [Cognizant Technology Solutions](#) — Bengaluru, India *Nov 2025 – Present*

- Deployed and validated document generation workflows for Liberty Mutual Insurance, ensuring 100% accuracy across policy document outputs prior to print production.
- Developed Java-based automation modules on IBM IID platform, reducing manual document processing steps and improving team throughput.
- Maintained structured data logs and quality tracking sheets used by cross-functional QA teams, applying strong analytical and data validation skills directly applicable to ML data pipelines.

AI/ML Engineer (Intern) | [Comviva Technologies](#) — Bhubaneswar, India *Jul 2024 – Sep 2024*

- Architected and led development of an ML-based Next Best Offer Recommendation System for a major telecom client, owning the end-to-end ML pipeline from data ingestion to deployment.
- Engineered hybrid recommendation engine combining K-Means Clustering, Collaborative Filtering, and ensemble ML models to deliver hyper-personalized customer offers at scale.
- Achieved 20% increase in customer engagement and 15% revenue uplift post-deployment, validated through A/B testing and Power BI dashboards.

SAP ABAP Trainee | [Gyansys Infotech](#) — Bengaluru, India *Jan 2025 – Mar 2025*

- Developed Classic and Interactive Reports in SAP ABAP, applying modular programming principles that improved reporting efficiency.

AI/ML PROJECTS

Emotionally Intelligent Persona Chatbot (GenAI) | [Python](#), [LLM APIs](#), [Prompt Engineering](#)

- Built a GenAI-powered conversational AI that simulates emotionally aware family and relationship personas (parent, sibling, partner), enabling users to engage in empathetic, context-sensitive dialogue.
- Engineered multi-turn memory management and persona-consistency prompting strategies to maintain character coherence across extended conversations.
- Deployed as a functional application using vibe-coding techniques, demonstrating full-stack AI product development from concept to live interface.

Next Best Offer Recommendation System | [Python](#), [Scikit-Learn](#), [K-Means](#), [Power BI](#)

- Designed and deployed ML recommendation engine for telecom revenue optimization; achieved 20% engagement lift and 15% revenue increase across customer base.
- Built Power BI dashboard to visualize customer segmentation clusters and offer performance metrics for business stakeholders.

Disease Prediction Suite — Heart Disease & Breast Cancer | [Python](#), [Scikit-Learn](#), [SVM](#), [Logistic Regression](#)

- Built binary classification models for early disease detection using SVM and Logistic Regression on real medical datasets (UCI repository).
- Applied end-to-end ML pipeline: data cleaning, feature standardization, cross-validation, and hyperparameter tuning — achieving high accuracy on held-out test sets.

Sonar Signal Classifier (Rock vs. Mine) | [Python](#), [Logistic Regression](#), [NumPy](#), [Pandas](#)

- Developed binary classification model on sonar frequency data to distinguish underwater rock and mine signatures with high test accuracy.
- Demonstrated proficiency in feature engineering, model evaluation metrics (precision, recall, F1), and binary classification best practices.

TECHNICAL SKILLS

Languages	Python (Advanced), SQL (Intermediate), Java, ABAP
ML / AI	Scikit-Learn, SVM, Logistic Regression, K-Means, Collaborative Filtering, LLM APIs, Prompt Engineering
Learning Now	PyTorch, TensorFlow, Neural Networks, NLP, Transformers
Data & Viz	Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel
Databases	MySQL, Oracle Database, SAP
Tools	Jupyter Notebook, VS Code, Git/GitHub, IBM IID, SAP Logon
Soft Skills	Team Leadership, Cross-functional Collaboration, Problem-Solving

EDUCATION

B.Tech in Computer Science Engineering CGPA: 8.15/10	<i>Sep 2021 – Jun 2025 (Expected)</i>
Siksha 'O' Anusandhan University (ITER), Odisha, India	
Higher Secondary Education (PCM + Computer Science) 91.4%	<i>Mar 2020 – Jun 2021</i>
Mothers Public School, Odisha, India	

CERTIFICATIONS

AI/ML Engineering — Comviva Technologies	<i>Sep 2024</i>
Data Analytics — Cisco Certifications	<i>Jul 2024</i>
Career Essentials in Data Analysis — Microsoft & LinkedIn Learning	<i>Jul 2024</i>

ACHIEVEMENTS & ACTIVITIES

- Solved 100+ Python problems and 20+ SQL challenges on coding platforms, demonstrating strong programming fundamentals.
- Actively building expertise in PyTorch, TensorFlow, and large language models through self-directed study and hands-on project development.
- Completed 10+ end-to-end AI/ML projects spanning classification, clustering, recommendation systems, and generative AI — all documented on LinkedIn and GitHub.
